5/22/70

Dear Howard,

Relet 19, thanks for enclosures. Will read on Butler later. I have interest, several different ways. Shaw Jeff speech: he is offered by agency that was to offer me. It would be good if someone could arrange what I regard as unlikely, esp. in the near future, for my presentation other side under same conditions. I'd not want to refer to him or his trial, only his ref to other evidence and , appropriate for a medical school, almost all on the medical evidence and its handling. Can those who gave you this initiate? Before I could appear, unless they have a cancellation before the end of school, I'd have a suit filed on this.

I've made nasty suggestions on your panel draft. If you read carefully, I think you may find it in no way weakens, does in some ways strengthen, and eliminates what is not reallt esential. I think the use of certified mail is a waste. You may recall I also sent copies to ann panelists, got replies from F only. They know. They also know I'll be suing, for I've filed papers with DJ and Earnley saw me there (with hate-filled eyes). So, it will be something if you get any reply, but the idea and the timing are excellent. But, if you feel you must certify, why not do as I did, address the letter to each one, sending carbons or Thermofaxes and checking the name on wach, if you feel necessary(isn't)m with the certified copy to Fisher. Use the addressee only part and get a return receipt. It would then be even better if he refused it.

Best,
